## MACHINE ROLLER KIT

- Made of high-strength annealed ductile iron
- These steel machine rollers have swivel tops that rotate 360° on chrome steel ball bearings to allow for easier turning
- The rollers form a "tank track" to revolve around a center load bearing plate in the frame to provide maximum maneuverability
- The weight of the load is transferred directly from the load bearing plate to the rollers, eliminating axle friction and requiring less power to start and move
- These units are virtually maintenance free
- Steering bars split in two and connect with sleeve for easy storage

### Kit Includes:

- (4) Machine Rollers
- (2) Steering Bars
- (1) Case
